1954

BEDDING PLANTS YEAR AROUND SALES BUILDERS

The post-war building boom has increased the bedding plant trade for many florists in many communities, and for several years a trend of more and more flat and band-grown annuals has been noticed. As people have plenty of gardening space around their homes, they have shown a preference for a quantity of flat transplants at modest prices rather than a few pots of petunias, marigolds or salvia which they feel do not make a real show for their money. Aside from the price factor, however, the public has enjoyed growing on these small plants in their own gardens. Flat transplants have proven equally as popular with many growers since they save considerable labor in production. The trend, therefore, in bedding plants is for small-sized flats sold as a unit.

In looking over your catalog for 1954, prepare not only to repeat those varieties that were popular last season but select many of the fine new offerings to whet the appetite of the new gardeners. Don't overlook the All-America Selections in planning your offerings to the home owners next spring. These prize plants are backed by their originators in national advertising, and there is plenty of publicity given these outstanding introductions by the garden magazines and newspapers. Your customers will expect to see these new things in your selections of plants.

It is up to all of us to see that enthusiasm for gardening on the part of the new home owners does not wane. Your customers' habit of coming to your shop for bedding plants will expand to purchases of cut flowers and house plants the year around.

Consider, too, that besides making friends and customers for you, there is money in the bedding plant trade. The cost of the seed is insignificantly small. The profit margin is higher than on anything you can grow, and the turnover is quick.

Let's go over the top in 1954 and make it the best bedding plant year on record. It will take some doing, perhaps even a sales campaign in your community; but 1953's peak can be topped and without too much effort.

FLOWER SEEDS

Fred C.
Gloeckner
& Company
Incorporated

15 EAST 26th STREET
NEW YORK 10, NEW YORK

Telephone: LExington 2-4198 - 4197

Gloeckner

seeds, bulbs, plants and cuttings are selected with diligent care as to type, productiveness and freedom from disease so that you may have the best with which to build your prospective crops. Our interest in you and your crops by no means ends with the sale. We are more than anxious to have the materials we sell, grow and prove profitable to you.

COVER MAN 1954

The twenty-three greenhouses and five retail shops that today comprise the firm of J. Elmer Betty & Sons, Inc., Wilmington, Del., spell a success story in the florist industry. Hard work, a devotion to flowers and a keen business sense have produced the outstanding career in floriculture enjoyed by Mr. J. Elmer Betty whom we take pleasure in presenting as our Cover Man for 1954.

Born at Silverbrook, Wilmington, his floricultural career began in 1891 when as a boy of fourteen he sorted pots and pulled weeds for the firm of G. W. Brinton & Son. He remained with the firm for ten years and then joined Mr. Frank Brinton in partnership. Later, with two small greenhouses, Mr. Betty began an enterprise of his own that he has developed to its present size with the aid of Mrs. Betty and their three sons.

Their son, John, heads the firm's retail department; Paul leads the way in flower production, while Charles oversees maintenance, decorating and transportation. The wives of John and Charles are also actively engaged in the business heading the Kennett Square and Newark stores respectively.

NEW & RECENT INTRODUCTIONS

ZINNIA BLAZE

A vivid Giant Cactus type, Blaze took the All-America award for the best new flower in 1954. It is outstanding for the uniform doubleness of its fluffy, gracefully quilled petals that measure over 5 inches across. Blooms are mandarin-red softening to scarlet orange as the flowers attain size. Plants 28-32 inches tall.

Tr. Pkt.	1/4 oz.	1 oz.
\$.75	\$2.25	\$6.50

ASTER POWDERPUFFS

A commercial outdoor variety suitable also for home gardeners. Growth is upright branching, but all flowers stem from the main stalk, making the entire plant a market bunch. August blooming, the flowers are white, pink, azure, rose, crimson and blue and measure 3 to 3 1/2 inches. They are fully double. Plants reach 24 inches in height but can be spaced 12 inches apart because growth is so upright.

Tr. Pkt.	1/4 oz.	Oz.
\$1.00	\$2.00	\$5.00

PETUNIA POPCORN

New Grandiflora Single Plain Edge variety recommended for pots and bedding. Flower size and form is like Snowstorm, but Popcorn is earlier blooming and the plants are compact and extremely dwarf.

Tr. Pkt.	1/64 oz.	1/32 oz.	1/16 oz.
\$1.75	\$3.30	\$6.00	\$11.00

VERBENA *Gloekner* SPECIAL

Unsurpassed for spring bedding plant sales, this fine mixture of dwarf Verbenas provides a wide range of colorful blooms, many of which are the popular white-eyed types. Especially adapted for 2 1/4 and 3-inch pots.

Tr. Pkt.	1/4 oz.	1/2 oz.	Oz.
\$1.00	\$2.00	\$3.50	\$6.00

MARIGOLD GIANT SPRY

An important development in the dwarf class, the blooms are about twice the size of regular Spry. Plants are twice the diameter of Spry but only slightly taller. Rich golden orange tufted centers are flanked by a single row of short velvety, mahogany-red guard petals. Giant Spry comes into bloom about five days later than Spry.

Tr. Pkt.	1/4 oz.	Oz.
\$1.00	\$1.50	\$6.00

•Jubilee—Light bronze	3.50
Lady Dorothy—Copper red	3.00
Schlegel's Early Bronze	2.00
•Sunbriar—Bronze	3.00

•HYBRIDS

Seed is sown July 5 to 15 for pinched crop for early winter flowering. Single-stem crop for early winter, sow August 5 to 15. High temperature inhibits germination of the seed, and one must, therefore, select a cool location for the flats in summer. However, for fall and winter sowing, germinate in 60 to 65 degree temperature.

Damping-off is a serious problem and all precautions should be taken to avoid it. The soil should be sterilized with steam or other efficient measures, and after the seed germinates, good air circulation and very little watering will help to prevent this trouble.

FOR GREENHOUSE CULTURE
CONTINUED FROM PAGE 3

YODER BROS. HYBRIDS

These important new improved hybrid snapdragons are the result of intensive hybridization by Yoder Bros., Barberton, Ohio. For December and January flowering, they are stiff stemmed and produce long tapering spikes. These hybrids also are very valuable for the spring crop. There is a minimum amount of side shoots which makes them well adapted to single-stem culture as well as for a pinched crop.

WHITE

Jet Pilot—A medium early paper white, long spikes; similar to White Wonder in form; much greater vigor.

IVORY

Apollo—Larger flowered and more vigorous than Margaret, otherwise very similar to that variety.

Citation—Earlier than Margaret, Apollo or Twenty Grand. Very large ruffled floret. Vigorous and uniform. Compact floret spacing on long spikes.

Twenty Grand—A medium early winter flowering variety; fine keeper.

LAVENDER

Bold Venture — Early, uniform, hard stem. Medium floret size. Color is best described as rich lavender or bright, light magenta.

LIGHT PINK

Top Flight—Earlier than Christina. Nearly identical with that variety in color, floret size and length of spike. Greater vigor and much more uniform. Partially shatterproof in presence of ethylene.

Whirlaway—Medium early; large floret; close spacing; long spike; a little deeper color than Mary Ellen.

ROSE PINK

Crusader—Color and season that of Dorcas Jane.

Gusto — Color somewhat deeper than Mary Ellen. Earlier, and more uniform in flowering. Florets held close to spike. Ruffled hood.

Pompey—Color nearly same or little deeper than Dorcas Jane. Earlier, more vigor, uniformity of growth and closer floret spacing than Dorcas Jane.

Star Charter—A wide floret similar to that of Christina; vigorous uniform growth; close spacing of florets. A beautiful flower and an excellent keeper.

DARK PINK

Pensive — A little later than Christmas Cheer but stronger. Cleaner growth, large floret.

Pink Star—Early. Very large floret. Medium to long spikes. Uniform and vigorous. Dark pink with light salmon overcast.

YELLOW

Day Star — Very early; good uniformity; long spike; flower a little small.

Seabiscuit—Uniform, vigorous, long spike and excellent floret form. Follows War Admiral, Patricia and Day Star. Outstanding winter or spring.

War Admiral—Just follows Day Star. Closer spacing and somewhat larger florets.

BRONZE

Cavalcade—A lively golden bronze; extremely vigorous; long spikes; outstanding keeper.

Gallant Fox—Deep orange bronze, similar in color to Lady Dorothy; much stronger and more vigorous; compact floret placement; a little earlier than Barbara.

Sun Briar — Lively orange bronze. Very long spike and hard stem. Medium height. Very long spike relative to over-all stem length.

ASTERS

BODGER'S WILT-RESISTANT STRAINS

QUEEN OF THE MARKET

These well-known early flowering Asters are of branching habit, about 20" tall, blooming mid-July.

Azure Blue	Light Blue or Lavender
Ballet Queen —Deep salmon rose	Peach Blossom —Flesh pink
Crimson	Rose
Dark Blue or Purple	White
	Finest Mixed

AMERICAN BRANCHING

Plants 2 to 2½ feet tall, branching, robust, flowers large, double and fine form. Flowers late August and early September.

Azure Blue or Dark Lavender	Rose
Crimson	Shell Pink —(Mary Semple)
Peach Blossom	White —Extra select, long stems
Purple	
	Finest Mixed

EARLY ROYAL BRANCHING

Plants branching 2 to 2½ feet, blooming mid-August, directly following the Queen of the Market.

Azure Blue or Dark Lavender	Purple
Deep Rose	Shell Pink
Peach Blossom —Lavender pink	White
	Finest Mixed

AMERICAN BEAUTY

Blooms from August and continues until frost. The large and double flowers are produced on long heavy stems; plants 2 to 3 feet high.

Azure Fairy —Dark lavender	September Beauty —Shell pink
Crimson	Silvery Rose
Deep Rose	White
Purple	Finest Mixed

	Tr. Pkt.	1/4 oz.	Oz.
Prices Above:	\$.40	\$.65	\$2.00

Gloeckner FLOWER SEEDS 7

PRINCESS TYPE (Wilt Resistant)

A very attractive new cutting type of wilt resistant Aster, 2 to 2½ feet tall, branching and free flowering, early blooming, bearing quantities of flowers on strong stems. Blooms mid-August. Good shipper.

Anne —Peach blossom	Linda —Clear rose
Barbara —Orchid	Margaret —Florist rose
Bonnie —Soft salmon rose	Marsha —Rich cinnabar scarlet
Elizabeth —Pure white	Susan —Clear deep blue

Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.50	\$.90	\$3.00

SINGLE CHINENSIS (Wilt Resistant)

Plants 1½ to 2 feet tall, flowers daisylike, petals wide and closely placed, blooms in late August.

Upright Single Rainbow Mixed.....	.25	.45	1.65

SUPER GIANT (Non-Resistant)

This is the largest and most fully double Aster class known. Plants about 2½ feet tall.

	Tr. Pkt.	¼ oz.	Oz.
El Monte—Crimson	\$.40	\$.85	\$3.00
Los Angeles—Shell pink40	.85	3.00

CONTINUOUS FLOWERING OF ASTERS

Sow Seeds	Pot Seedlings	Bench Plants	Flowering Date Approximate
Dec. 20	Jan. 10	Mar. 1	May
Feb. 1	Feb. 20	Apr. 1	June
March 15	April 10	May 15	July
April 20	May 10	June 15	August
May 20	June 10	July 15	September
June 10	July 1	Aug. 15	October
June 20	July 15	Aug. 20	November
July 10	Aug. 1	Sept. 1	December
July 15	Aug. 10	Sept. 15	January
August 15	Sept. 10	Nov. 1	February
Sept. 10	Oct. 1	Dec. 1	March
Oct. 20	Nov. 15	Jan. 1	April

Plants must be given additional light between September 1 and May 1 regardless if they are in seed flats or in the bench. If the plants are not lighted while in small pots, they develop a rosette of leaves and growth of the stem and flowers is delayed. Plants should be lighted until the first flowers show color.

Low wattage bulbs will suffice for additional light. On a four-foot bench, 40-watt lamps spaced 6 feet apart and about 24 inches above the plants will give ample light for this crop.

ADDITIONAL LIGHTING SCHEDULE

- 3 hours during the months of September, October, March and April.
- 4 hours during the months of November and February.
- 5 hours during the months of December and January.

SHAGGY TYPES

The interlaced petals of the Asters in this group produce an attractive fluffy or shaggy flower that you will find distinctive and popular.

EARLY GIANT

Flowers are of the large Giant of California type, while the plants are shorter, about 1½ feet in height. This class is early blooming, coming into flower by the first week in September.

Light Blue	Rose Marie —Rich rose
Peach Blossom	White

Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.50	\$.90	\$3.00

IMPROVED CREGO

Plants robust, branching about 2½ feet tall, flowers large, double and well formed, one of the finest varieties for all purposes. Blooming mid-August.

Azure Blue	Peach Blossom
Blue Flame —Rich blue	Shell Pink
Crimson	Purple or Dark Blue
Deep Rose	White
Light Blue —Lavender	Finest Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.40	\$.65	\$2.00

Azure Ball—(New)—Fully double, long-stemmed, clear light blue. Tr. Pkt. **\$1.75** ¼ oz. **\$3.20** Oz. **\$9.60**

Pink Ball—(New Ball Shell Pink)—Large 3½ to 4 inch fully double flowers of soft shell-pink carried on long stems. Rarely shows any center. Blooms mid-August. Excellent flowered under lights in early spring. Needs little disbudding as laterals are few.

Tr. Pkt. **\$1.75** ¼ oz. **\$2.50** Oz. **\$7.50**

White Ball—(New Ball White)—The large pure white flowers of this new Aster are exceptionally double and borne on stiff stems. Blooms late August.

Tr. Pkt. **\$1.50** ¼ oz. **\$2.50** Oz. **\$7.50**

Powderpuffs — New — Upright branching 2 feet high. August bloom. Mixed colors. See novelty page.

Tr. Pkt. **\$1.00** ¼ oz. **\$2.00** Oz. **\$5.00**

Double Camellia Flowered Mixed	.15	.30	1.00

Fibrous Begonias are a necessity item for spring bedding sales. They are used extensively in combination work and are also popular house plants throughout the year.

Production from seed is simple. January sowing produces plants for spring bedding work. The fine seed is lightly pressed into a sterilized fibrous medium. The seed is kept moist, not covered, and germinates best at 60 to 70 degrees. An economical method has been to shift the seedlings to flats spaced 2 x 2 inches and grow them on until they become crowded. Then transfer to 3- or 4-inch pots.

Potting soil should contain one part peat, one part sand and one part soil—a fibrous medium that will not pack is essential. To keep the plants moving, a temperature of 60 degrees is best. The plants do well in shade or full sun, but are best shaded during the summer.

Try monthly sowings from August to March for a constant supply to meet your customer's demand.

BELLS OF IRELAND

(*Molucella Laevis*)
7000 SEEDS PER OZ.

The graceful 2-foot branching stems of this curious plant are covered with 2-inch translucent pale green flowerlike sheaths, resembling bells, that contain the small white flowers. The branches last well when used alone or with other flowers in an arrangement and may be dried for winter use. Culture from seed is simple. May be grown in greenhouse benches, pots or outdoors where the season is long.

CALCEOLARIA

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well-rotted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Sow the seeds lightly over the surface and cover the flat with a suitable covering. Calceolaria will germinate better when the temperature is cool, therefore, well shaded locations are better. August sowing will make large plants for May, while November sowing will make good four-inch plants. Some growers have used the wick irrigation method to germinate the seed with very good results.

GILBERT'S STRAINS

This is an improvement over the original Multiflora Nana type. Compact habit of growth; good selection of colors in the mixture; excellent foliage.

CHRYSANTHEMUMS (ANNUAL)

Another group which is finding favor with florists for cut flower material. Chrysanthemums last remarkably well as a cut flower, but for best results keep them in water 24 hours before marketing. Sow in mid August to follow early Chrysanthemums. Responds very well to additional light.

	Tr. Pkt.	Oz.
Merry Mixture—(Gay Tricolors).....	\$.40	\$2.25

Gloekner FLOWER SEEDS

CINERARIA

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. CINERARIAS are attacked by this wilt which is a soil-borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flats to finished pot. If you do use old chrysanthemum soil be sure to sterilize it. To be on the safe side, it is recommended to steam sterilize soil before using.

Siter's Hybrids

Trade Mark

They are a distinct improvement over the original Siter's Strain, and because they are Hybrids from original crosses, cannot be offered by anyone but the originator.

This is an entirely new group of Cineraria Hybrids, blended for a perfect combination of colors, ranging from bright-eyed types through the finer pastel shades.

These new types carry large flower heads with medium, large individual flowers.

DAUERHEIM STRAIN

This strain is compact, free flowering and matures early. Tests have shown that it is more disease resistant and will do very well under conditions here in the States. The foliage is of medium size. The well-proportioned blooms are particularly large, the white and white with eye often measuring six inches across.

Dauernheim's have selected and improved this strain for a number of years and in their trials have found this strain to be superior.

DAHLIAS

These are easy to raise from seed and are overlooked by many florists. Vast improvements have been made in these strains which come remarkably true to type and height. They are early flowering, blooming profusely the same year they are sown.

For small pot plant sales in the spring, the seed should be started during January or February. To produce four-inch pot plants for Mother's Day, sow the seed in November.

Coltness Hybrids—Dwarf single type, very free flowering, height 2 feet, choice mixed colors50	1.50

DELPHINIUM PACIFIC STRAIN VETTERLE & REINELT

This is the finest strain of Delphinium yet introduced. From our personal observations in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense in size, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphiniums require a well-drained soil, neutral in reaction. January sowing will produce flowers during the summer.

ASTOLAT SERIES

The color variations in this series extend from pale blush through lilac pink to deep raspberry rose. Large brown, fawn and black bees lend interesting contrast.

Tr. Pkt. \$2.00 1/8 oz. \$3.50 1/4 oz. \$6.50

BLACK KNIGHT

The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

BLUE BIRD SERIES

This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers 2 1/4 inches in diameter on very long, graceful spikes.

BLUEJAY SERIES

Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

CAMELIARD SERIES

A **pure lavender self**, with **white bee**, individual flowers are very round and flat. Excellent growing habits.

GALAHAD SERIES

Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong whippy stems with a high percentage of mildew resistance.

GUINEVERE SERIES

Light Pink Lavender self with **white bee**. Individual florets 2 1/2 to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

KING ARTHUR

Brilliant Royal Violet with large **white bee**. Individual florets 2 1/2 inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

LANCELOT SERIES

Clear Lilac self with **white bee**.

PERCIVAL SERIES

A companion to the Galahad Series. Large **glistening white flowers** with strongly contrasting **black bee**.

ROUND TABLE SERIES

This represents **all the color combinations of the Knights and their Ladies** which will eventually be introduced. Some three hundred different crosses were used to make up this group.

SUMMER SKIES SERIES

Clearest Light Blue with white bee. Individual florets 2 to 2 1/2 inches in diameter. Ideal for cut flower purposes. Mildew resistance—40 to 60%.

LARKSPUR

Larkspur seed may be sown directly in the open in the fall and will flower the following spring. There are two distinctly different methods used and each have a number of successful supporters. The first method is to sow the seed fairly early in the season about August 15 to September 15th. The small Larkspur seedlings will be sufficiently large enough when cold weather sets in to winter over when given a light mulch. The other method employed is to sow the seed in rows in late October or early November so that it will not germinate until early the following spring. This crop of Larkspur will generally come in shortly after Delphinium Belladonna.

SUPREME STRAIN

A new strain of the popular Giant Imperial or Base Branching Type of Larkspur. Plants have an upright habit with longer spikes and fuller flowers.

Dark Blue Supreme—Rich violet purple

Lilac Supreme—Clear lilac

Pink Supreme—Clear rose pink, deeper in color than Pink King and Los Angeles Improved

BRANCHING STOCKS (Continued)

GIANTS OF CALIFORNIA

The Giants of California can also be grown similarly to the non-branching type. When grown this way, the side shoots should be removed. For the retail grower the branching types are gaining popularity. These should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

TRYSONIC GIANT IMPERIAL

Years of research went into producing Trysonic Stock that produces 85 per cent or more double-flowered plants when sown from seed. In addition to this excellent trait, when the seedlings reach the four-leaf stage you can pick out the small, weak ones that will develop into singles and thus insure yourself close to 100 per cent double-flowering plants.

FIERY RED

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid, the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings. This non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling, the largest and most vigorous plants should be selected.

SOWING DATES OF COLUMN OR NON-BRANCHING STOCKS FOR THE VARIOUS BLOOMING DATES

Time of sowing	Flowering
August 1.....	January
September 1.....	February
October 1.....	March
November 1.....	April
December 1.....	May
January 1.....	Mother's Day
February 1.....	June
February 15.....	June 15

SWEET PEAS

SPRING FLOWERING

CUTHBERTSON STRAIN

This new class of Sweet Peas has taken the place of the Spring Flowering types previously offered. Indoors, seed should be sown November 1st, and such planting will start to bloom in April. **The Cuthbertson Class is recommended for sowing after November 1, and not earlier because it needs the stronger spring sun to bloom.**

They are exceptionally successful outdoors. In the North, they flower two weeks later than the Early Flowering, and two to three weeks earlier than the Summer Flowering.

ZVOLANEK'S

MULTIFLOWERED CLASS

A new, free-flowering class of Sweet Pea which produces many stems with five and six flowers. Stems are exceptionally long as well, making this a profitable market variety.

Lavender — Giant size blooms on exceedingly long stems.

Orange Cerise — Characterized by its vivid color and large flowers.

Rose — Vigorous grower with large, medium-rose flowers.

Salmon Pink — Rose-pink flowers with tinge of salmon. Four and five flowers to the stems which are long but not so strong as the other varieties in the class.

• **Whirlwind** — Considered the best of the group. Five or six flowers of a light rose are borne on strong 14-inch stems. Vigorous grower.

White — Pure white flowers, many fives, are carried on strong stems. Good for wedding work.

Golden California Wonder—Golden fleshed type	1.00	3.35	10.00
Harris Early Giant (Sweet)—The best very early pepper for home and market gardens. Large fruits, slightly tapered. Deep green changing to bright red.....	.65	2.25	6.50
Hungarian Yellow Wax (Hot)—Yellow very early. Fruits long, tapered. Waxy light yellow75	2.50	7.50
Pimento (Sweet) — Standard variety for home and market garden. Fruits heart-shaped and very smooth45	1.50	4.50
Ruby King (Sweet) — A favorite for home and market garden. Fruits large and slightly tapered. Bright red65	2.25	6.50
Sweet Yellow (Sweet) — Skin golden yellow, flesh thick and bright yellow.....	.65	2.25	6.50
World Beater (Sweet) — An early sort. Fruits large, oblong; flesh thick and sweet. Bright red60	2.00	6.00

RADISH

	Oz.	1/4 lb.	Lb.
Improved Scarlet Globe — Very early sort, valuable for out of door culture and for forcing. Uniform, rich bright, scarlet, flesh white	\$.15	\$.45	\$1.50
Scarlet Turnip, White Tip — Popular variety, small top. Root bright scarlet with white area about the tip15	.40	1.25
White Icicle—The best early white variety. Roots long, tapered, very white throughout20	.40	1.30

TOMATO

	Oz.	1/4 lb.	Lb.
Bonny Best (73 days) — A general purpose tomato. Fruits evenly colored scarlet-red, medium large	\$.60	\$2.00	\$6.00
Break O'Day (73-75 days) — Early wilt resistant, globe-shaped sort. Fruits large, scarlet of good quality	.60	2.00	6.00
Chalk's Early Jewel (75 days) — Very thrifty, heavy producer. Fruits scarlet-red, large and firm	.50	1.70	5.00
Dwarf Stone (82 days) — Strictly dwarf and tree-like, require no training. Fruits bright red, medium sized	.60	2.00	6.00
Earliana (64-66 days)—Particularly valuable for home garden and early market. Fruit medium size flattened	.70	2.35	7.00
Globe "A" (Forcing) — Developed by Ohio State Experiment Station—Pink fruits a little larger than regular Globe. Ships well 1/4 oz.	5.00		
Globe (Livingston's) (81 days) — Heavy producer, fruits purplish pink, large globe shape, scarlet red	.65	2.00	6.00
Golden Queen —Large yellow fruit, mild flavor	.70	2.35	7.00
Greater Baltimore (83 days)—Similar to Stone and particularly valuable for canning	.50	1.75	5.00
John Baer (73 days)—Very similar in every respect to Bonny Best	.60	2.00	6.25

	Oz.	1/4 lb.	Lb.
Marglobe (75-78 days) — Resistant to Fusarium wilt. Fruits uniform deep scarlet, globe shape and of distinct quality	\$.60	\$2.00	\$6.00
Master Marglobe (75-78 days) — HIGHLY resistant and heavily productive	.80	2.75	8.00
Michigan State Forcing — Developed at Michigan State College. Very productive under restricted light conditions. Fruits deep scarlet, globe shaped, are borne in clusters of five to eleven 1/4 oz.	.50	1.50	
Oxheart —Heart shaped. Pink fruit, mild flavor	1.10	3.70	11.00
Ponderosa (85 days) — One of the best for home use. Fruits purplish-pink, very fleshy with few seeds, of very mild flavor	.85	2.75	8.50
Pritchard (Scarlet Topper) —Wilt resistant, heavily productive. Fruits large, globular, scarlet and well colored about the stem end	.65	2.20	6.50
Rutgers (78 days)—Highly recommended for second early maturing variety for canning and tomato juice. Fruits similar in shape to Marglobe. Uniformly colored flesh	.65	2.20	6.50
Stokesdale (70-73 days) — Early suitable for shipping. Fruits uniform deep scarlet, globe shape	.65	2.20	6.50
Stone Improved (85 days) — Very solid fruit scarlet red, flat shape	.65	2.20	6.50
Valiant — early red	.90	3.00	9.00

STOKESCROSS No. 2: Maturing 70 days, average size of fruit 4.5 ounces. This large size, early maturing hybrid tomato is both a market and a canner type. A very heavy producer with uniformly large fruit.

STOKESCROSS No. 5: Maturing 75 days, average size of fruit 4.7 ounces. This is perhaps the strongest hybrid yet produced. It is recommended for market or for processing, and is an excellent producer. This new cross for 1953 is a magnificent tomato which carries enthusiastic endorsement as one of the finest hybrids ever produced.
